POLICY JUSTIFICATION

Norway—AIM-120C-7 AMRAAM Missiles

The Government of Norway has requested a possible sale of 36 AIM-120C-7 Advanced Medium Range Air-to-Air Missiles (AMRAAM), 8 Captive Air Training Missiles (CATMs), containers, support equipment, spare and repair parts, Common Munitions Bit/Reprogramming Equipment (CMBRE), publications and technical documentation, U.S. Government and contractor logistics support services, and other related elements of logistics support. The estimated cost is \$80 million.

The proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a NATO ally which has been, and continues to be, an important force for political stability and economic progress in Europe.

The Government of Norway requires these capabilities for mutual defense, regional security, force modernization, and U.S. and NATO interoperability. This sale will enhance the Royal Norwegian Air Force's ability to defend Norway against future threats and contribute to current and future NATO operations.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Corporation in Waltham, Massachusetts. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Norway.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 13-77

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology*

1. AIM-120C-7 Advanced Medium Range Air-to-Air Missile (AMRAAM): The AIM-120 is a radar guided missile featuring digital technology and micro-miniature solid-state electronics.

AMRAAM capabilities include look-down/shoot-down, multiple launches against multiple targets, resistance to electronic countermeasures, and interception of high- and low-flying and maneuvering targets. The AMRAAM All Up Round (AUR) is classified Confidential, major components and subsystems range from Unclassified to Confidential, and technical data and other documentation are classified up to Secret.

2. A determination has been made that Norway can provide substantially the same degree of protection for the sensitive information being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objective outlined in the Policy Justification.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Norway.
