

ENTERPRISE ARCHITECTURE (EA) PROGRAM

EA PROGRAM

- 3 Certificates
- Concentration in Government Information Leadership M.S. Degree

Enterprise Architecture (EA) is at the heart of agencies' ability to achieve performance objectives through optimizing business processes and investing effectively in information systems. The EA Program prepares architects with the leadership, policy, and technical competencies required for the three levels of EA responsibilities as identified by the Office of Personnel Management. Effective Enterprise Architects must be proficient in a myriad of competencies ranging from transformational leadership and communication to envisioning desired organizational and technology capabilities.

"The higher education field is assisting in the maturation of the enterprise architecture discipline with the introduction of new degree programs and other initiatives in EA. Leaders responsible for EA must be aware of developments such as this, and consider plans to take advantage of them" (Gartner Inc., 2010).

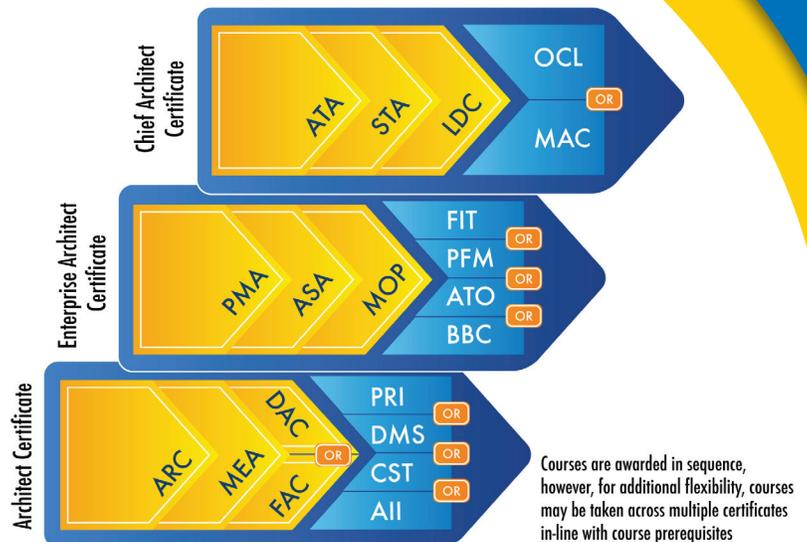

The EA program prepares students to:

- Lead the development, implementation and maintenance of enterprise architectures
- Leverage people, capabilities, and technology to achieve organizational objectives
- Analyze EA content and recommend strategies to improve mission performance

The EA program consists of three certificates:

- Architect – Focuses on the development of architectures
- Enterprise Architect – Focuses on the analysis and management of architecture
- Chief Enterprise Architect – Focuses on leading organizational transformation through the discipline of EA

Students may apply their certificate(s), equivalent to 9 or 15 graduate-level credit hours, toward master's or doctoral degree programs at several Academic Partner universities across the U.S.

* See catalog for course names and information corresponding to 3-letter codes.
