Dr. Samuel A. Musa Appointed Homeland Security Science and Technology Chair

Dr. Samuel A. Musa has been appointed as the Homeland Security Science and Technology Chair at the Center for Technology and National Security Policy of the National Defense University.

As the Homeland Security Science and Technology Chair, he is responsible for providing policy insights and advice on the civilian/military interface related to homeland security issues and to identify and assess state of the art technology, capability and resources designed to protect the homeland.

Dr. Musa will also serve as a focal point for the Department of Homeland Security at the National Defense University.

The Center for Technology and National Security Policy examines the implications of technological innovation for U.S. national security policy and military planning by combining scientific and technical assessments with analyses of current strategic and defense policy issues.

The National Defense University educates military and civilian leaders through teaching, research and outreach in national security strategy, military strategy, and national resource strategy.

The National Defense University Public Affairs point of contact is Dave Thomas – 202-685-3140 or thomasd2@ndu.edu.
