<b>Military Logistics Director</b>	Seven self-propelled cannons and another one today. That would be a total of eight self-propelled cannons.
<b>President Leader</b> [ <i>Saddam Hussein</i> ]	Part of the division?
<b>Secretary of Diwan</b>	Sir, some of the divisions destroyed tanks that were operational because they were not able to pull them out quickly.
<b>President Leader</b>	No!
<b>Military Logistics Director</b>	There are recovery vehicles at the transportation units. We could assign two of them to work with the divisions. The 9 <sup>th</sup> Armored Division is especially in need of it.
<b>Secretary of Diwan</b>	I think the 4 <sup>th</sup> Infantry Division destroyed approximately eight tanks.
<b>President Leader</b>	What a waste. The price of each tank is 800,000 Dinars.
<b>Secretary of Diwan</b>	Yes, Sir.
<b>President Leader</b>	Could they disconnect some parts of these tanks so the enemy would not be able to restart them until they are able to recover them by disconnecting the transmission or another part?
<b>Military Logistics Director</b>	It is possible then for the recovery operations to use the civilian service. It is reliable.
<b>Minister of Defense</b>	What is the civilian service?
<b>Planning Director</b>	It is available and authorized.
<b>Military Logistics Director</b>	It is possible to have a civilian campaign gather the spoils.

<b>Minister of Defense</b>	It could be arranged, Sir. We need it.
<b>President Leader</b>	The civilian campaign is ready. Let us know.
<b>Planning Director</b>	It is authorized, Sir. It is authorized to use any means necessary by coordinating with the related governor.
<b>Minister of Defense</b>	The governors shall be contacted by phone in order to launch a large campaign.
<b>President Leader</b>	Staff Lieutenant Colonel Subayh 'Omran shall issue a letter in that regard now.
<b>Secretary of Diwan</b>	Yes, Sir.
<b>President Leader</b>	Tell Staff Brigadier General Tariq Hamad Al-'Abdullah (The Diwan Director) to issue a letter to all the governors of Basra and Maysan in this regard.
<b>Deputy Chief of Staff of the Army for Operations</b>	I think a letter should be issued to forbid the destruction of enemy armor [ <i>that have been seized</i> ].
<b>Planning Director</b>	Sir, it should also be sent to the governors of Diyala and Wasit.
<b>President Leader</b>	And the governors of Kut and Diyala.
<b>Deputy Chief of Staff of the Army for Operations</b>	Staff Lieutenant Colonel Subayh 'Omran said that some [ <i>Iraqi</i> ] units are destroying the [ <i>enemy's</i> ] armor.
<b>President Leader (continuing)</b>	...to use all civilian capabilities that are under the jurisdiction of the local department, all the government institutions and facilities at their governorates, in order to assist the army in clearing out the war spoils. <b>Deputy Chief of Staff of the Army for Operations</b>	The enemy was able to locate the headquarters of the 3 <sup>rd</sup> Corps.
<b>Planning Director</b>	No. They are searching for the ordnance and fuel storages in order to strike them and the 3 <sup>rd</sup> Corps Headquarters.
<b>Minister of Defense</b>	Have they targeted anything in their raids?
<b>Planning Director</b>	Not yet.
<b>Military Logistics Director</b>	Sir, the enemy's aircraft passed over the 20 <sup>th</sup> Mechanized Infantry Brigade and the 5 <sup>th</sup> Infantry Division. However, the enemy's air operations and the artillery bombing were very small. I have spoken with the Chief of Staff of the 5 <sup>th</sup> Division and he said that the bombing of the enemy's artillery has been reduced and the enemy's air campaign has been limited.
<b>Army Chief of Staff</b>	If the issue is to withdraw according to the enemy's artillery campaign, in this case it would be important to monitor it.
<b>Planning Director</b>	Yes, it should be under surveillance.
<b>Army Chief of Staff</b>	The enemy's Air Force activities may have been reduced due to the damages that we inflicted upon them yesterday, which caused them a setback. Therefore, they are afraid to carry out any air raids against us because we have missiles that could have a tremendous effect on them. As for the reduction of the enemy's bombing...

It was on a bridge at (Shaikh Wisal). A tank was moving in order to cross the bridge and the right side of the tank went off track. When it was crossing the bridge it looked like this. Therefore, the tracks pulled it in this direction and turned over. During that time, I was the commander of the intelligence headquarters of Sulaymaniyah. Using two other tanks, I turned it back on its tracks. I pulled it with both tanks and the driver got in it and drove it. It had gone down 10 meters and in 90 minutes I pulled it out and saved it. <p><i>[continuing the phone conversation]</i></p>	<p>The 10<sup>th</sup> Armored Division at Dezful sector with enemy units in front of it that have become armored divisions supported by a number of artillery battalions. The artillery battalions of the division is supported by 4 -5 additional battalions. The position of these battalions is...from Naderi Bridge to the east of Karkha River. <i>[Illegible]</i> the isolated area between Karkha River and Duzz River. They could even be around or to the east of the city in an isolated area. You did not see these units. There were many reconnaissance sorties against this division and we received a mission report for each sortie, saying these units were not at that location. While the enemy's units, defense position, all defense preparations and ten artillery battalions were present there, all types of artillery, starting with the 130 mm self-propelled artillery to the Grad and more. It is not acceptable to have this large enemy concentration, which is an armed division plus ten battalions of artillery, and when we asked for air reconnaissance, the answer was "nothing seen in the area". How is that possible? Did the enemies wear invisible hats? Where did they go? Yes, true, he is saying "I saw our units on such and such distance, which he gave a good and accurate position of our troops, while the enemy is directly in front of them and Karkha River is between our troops and the enemy's troops..."</p> <p>The areas of Dezful and Naderi Bridge are in the enemy's hands. Our units are west of Karkha River while the enemy's troops are to the east of Karkha River, holding full defense positions, in addition to the troops they received as support units, approximately five artillery battalions and other things. Therefore, if our air reconnaissance were not effective today, the enemy could prepare to strike the 10<sup>th</sup> Armored Division. Therefore, we should strike them before they strike our division. Yes, thank you.</p> <p style="text-align: right;">- The phone call ended -</p>

<b>Minister of Defense</b>	Sir, that is to say, the important thing is to solve this issue.
<b>Minister of Defense</b>	Yes, they are definitely targeting everything.
<b>Deputy Chief of Staff of the Army for Operations</b>	They conducted five air reconnaissance flights and their reports did not indicate any sightings.
<b>Minister of Defense</b>	I do not think they have conducted an accurate reconnaissance.
<b>Deputy Chief of Staff of the Army for Operations</b>	The enemy has an armored division and ten artillery battalions and they are attacking the 10 <sup>th</sup> Armored Division daily. I am worried because most of these artillery battalions that joined the enemy's position have not been used yet...two Grad battalions in addition to what they previously had a 130 mm artillery battalion, two regiments of infantry plus the 2 <sup>nd</sup> Infantry Brigade, and what's left of the 2 <sup>nd</sup> Brigade and the 37 <sup>th</sup> Armored Brigade, in addition to their flights being ineffective today. As you know, the enemy has artillery support, armed helicopters, and an air force which could inflict damage on us if they used it to attack us.
<b>Minister of Defense</b>	Yes. Where is Ibn-al-Walid Armored Brigade positioned now?
<b>Deputy Chief of Staff of the Army for Operations</b>	Ibn-al-Walid Armored Brigade has a large army at Shayb area or near Fakkah.
<b>Minister of Defense</b>	Is Fakah located on Shayb axis?
<b>Deputy Chief of Staff of the Army for Operations</b>	It is on the axis from there. That is to say, behind them, although I am not sure. Staff Colonel Myassar (Military Logistics Director), please confirm that.

<b>Minister of Defense</b>	Okay, then where is the remainder of the force?
<b>Deputy Chief of Staff of the Army for Operations</b>	Where did they position the remainder of the Ibn-al-Walid Armored Brigade?
<b>Military Logistics Director</b>	One large battle group with the brigade headquarters.
<b>Minister of Defense</b>	How much of the forces that we need can we take from the 9 <sup>th</sup> Armored Brigade?
<b>Army Chief of Staff</b>	We can move on with the 11 <sup>th</sup> Infantry Division.
<b>Minister of Defense</b>	Yes, why are we waiting? We said yesterday that we are worried it could be too late. The position of the 9 <sup>th</sup> Armored Division helps more than the other divisions. We are using it as reinforcement.
<b>Army Chief of Staff</b>	We shall return the 9 <sup>th</sup> Armored Division.
<b>Minister of Defense</b>	Are we just talking here and continuing to discuss it every hour? That is to say, didn't we discuss it today, talk about it yesterday, and issue recommendations?
<b>Military Logistics Director</b> <i>(On the phone with Chief of Staff of the 3<sup>rd</sup> Corps)</i>	- Greeting introduction - Sir, we need to know the distribution of Ibn-al-Walid Armored Brigade. Yes ... Shaib... Yes ... That is to say, the brigade is short one tank battalion ... A battle Group at Shaib and the rest at Fakah, in Fakah area, they are all in a concentrated formation. Do you have anything in the direction of the 10 <sup>th</sup> Armored Division and north of it? ... That is to say, the force that moved during that time to clear Imam Na'er. Did it return yet? Thank you, Sir. He is right here, Sir. Do you want to speak with him? Just a minute, Sir.

<b>Minister of Defense</b>	Could our artillery reach Dezful?
<b>Army Chief of Staff</b>	Yes, Sir.
<b>Minister of Defense</b>	Okay, why don't you attack the bridge with the artillery in order to prevent the enemy from receiving reinforcements?
<b>Deputy Chief of Staff of the Army for Operations</b>	Sir, the bridge is under the enemy's control.
<b>Army Chief of Staff</b>	Do you mean Dezful Bridge?
<b>Minister of Defense</b>	Why won't we destroy it with the artillery in order to prevent the enemy's reinforcement from passing between Gilan and Dezful (he means the bridge of Dezful)?
<b>Planning Director</b>	The artillery did not destroy the bridges of Dezful.
<b>Deputy Chief of Staff of the Army for Operations</b>	These bridges are similar to Khalid Ibn-al-Walid Bridge and the 17 <sup>th</sup> of Tammuz Bridge.
<b>Minister of Defense</b>	It doesn't matter! However, if you attack it with an artillery battalion, what is it going to do to it?
<b>Planning Director</b>	It is out of range, Sir.
<b>Minister of Defense</b>	Out of range?
<b>Deputy Chief of Staff of the Army for Operations</b>	Out of the artillery range.
<b>Minister of Defense</b>	Has the range been examined?

(72-230)  
Top Secret

<b>Planning Director</b>	What?
<b>Army Chief of Staff</b>	The bridge.
<b>Planning Director</b>	The bridge of Dezful is out of range.
<b>Army Chief of Staff</b>	Even if we positioned the artillery in the front, the artillery shells cannot destroy the bridge.
<b>Planning Director</b>	This is one aspect, Sir.
<b>Army Chief of Staff</b>	Let us discuss it from the tactical aspect. What can they do with this bridge? Do they have defense preparations now? Rather, does the open position of their units suggest that it is an offensive openness or is there another operation? Our information indicates that the enemy's units are on the river, securing their positions and planting mines.
<b>Minister of Defense</b>	Does the enemy possess Luna missiles?
<b>Army Chief of Staff</b>	Sir, they have Grad missiles while we have Luna missiles.
<b>Minister of Defense</b>	Okay, why don't we use the Luna missiles against their positions?
<b>Planning Director</b>	I am sure it was struck yesterday.
<b>Military Logistics Director</b>	They struck it.
<b>Planning Director</b>	The base?
<b>Military Logistics Director</b>	The base, the day before yesterday, during the night.

	[ <i>Illegible</i> ].
<b>Minister of Defense</b>	Then they [ <i>the enemy</i> ] deserve that.
<b>2<sup>nd</sup> Corps Commander</b>	Yes, they do.
<b>Minister of Defense</b>	They should die.
<b>Air Force Commander</b>	Sir, even the slit trenches must be covered, in order to protect them from the cluster bombs.
<b>2<sup>nd</sup> Corps Commander</b>	We have local iron, wood, tin ribbed plates and cement. The Army Chief of Staff saw that and I told them many times to take the reinforcement materials from Qasr-e-Shirin, Sumar, and Gilan, or wherever they find these materials in order to secure their positions. Should they secure their own positions, or should I secure it for them? I don't know. There are a large number of bulldozers in Diyala province and the province did not fall short of providing these bulldozers, especially Diyala's governor, who fulfills what we need from them, in addition to what we have available in the army.
<b>Deputy Chief of Staff of the Army for Operations</b>	Even the Iranian equipment?
<b>2<sup>nd</sup> Corps Commander</b>	And even Iranian equipment.
<b>President Leader</b>	They are learning, just keep pushing them ...
<b>2<sup>nd</sup> Corps Commander</b>	I was with the comrade members of the Military Office at the division headquarters and there was a small ravine that contained 50 vehicles parked beside each other and there was not an officer present to distribute them [ <i>continued on next page</i> ]

Then I asked the commander of the 4th Infantry Division, "What are these vehicles?" He said it is...so I told him, "Whenever you see the driver getting out of the vehicle, he should be ordered to move it and park it away from other vehicles." How about the exercises that we previously conducted? We have stressed these issues during the last exercises, especially during every analytical conference and they returned to their bases to implement these exercises. They are disregarding the issue of the vehicles, therefore, I say anyone who cannot protect himself will be injured and we cannot do anything for him.</p>
<b>President Leader</b>	<p>Yes, of course.</p>
<b>2<sup>nd</sup> Corps Commander</b>	<p><u>Paratroopers' resistance force.</u>  <u>The Commander.</u> The commander of a Mechanized Infantry Regiment from ... "We will mention his name when the regiment is assigned."  <u>The Formation:</u> A mechanized infantry regiment from the 12<sup>th</sup> Armored Division less one company of special forces. This is not allowed, because it was set according to specific rules.  <u>Luna Missile 39 Artillery Battery:</u> Remains under the command of the corps and opens in the area of Drawishka, even though we do not have the ordnance for these batteries, Sir. <b>2<sup>nd</sup> Corps Commander</b>	The battery brought 16 missiles with it when it arrived.
<b>Army Chief of Staff</b>	These are to be used only with approval.
<b>2<sup>nd</sup> Corps Commander</b>	Yes, when we used the Luna against some positions, we obtained your approval first. Then we struck the area of the Strait of Bay-Taq. In addition, we used it to bomb Sarbil-e-Zahab and behind it before our units reached it. We used it twice during your visit to us and we were striking specific targets and we informed you that we were using it.
<b>Army Chief of Staff</b>	Of course, so it would not be there left unused.
<b>2<sup>nd</sup> Corps Commander</b>	No, I mean it is now without ordnance. Therefore, you either pull it out or supply us with the ordnance. However, this battery equipment must have a purpose and that is why I must mention it.

<b>Minister of Defense</b>	Why would they need this?
<b>2<sup>nd</sup> Corps Commander</b>	So that the divisions do not open their administrative areas on the rear. They will only take what they need and leave the rest.

<b>President Leader</b>	If the strike is against the city of Dezful, it could be possible.
<b>Planning Director</b>	It could be struck.
<b>Minister of Defense</b>	Sir, the distance between Karkha River and Karun River is approximately 10-12 kilometers, 3 kilometers is within the margin of error. <b>Deputy Chief of Staff of the Army for Operations</b>	Sir, strike them with the R-17 missiles.
<b>2<sup>nd</sup> Corps Commander</b>	Sir, do you mean with the Luna missiles?
<b>Minister of Defense</b>	With the Luna missiles.
<b>2<sup>nd</sup> Corps Commander</b>	Yes, it has a range of 67 kilometers.
<b>Minister of Defense</b>	Yes, that is if we have more of the Luna missiles stock than the R-17's.
<b>Planning Director</b>	Yes, Sir.
<b>Minister of Defense</b>	It would be possible for us to use the Luna missiles against Dezful and others.
<b>Planning Director</b>	Sir, we indeed did that yesterday. We began striking the air base in Dezful the day before yesterday, Sir.
<b>Minister of Defense</b>	Our defense positions must be reinforced.
<b>Planning Director</b>	That is why the two batteries are located there, which consist of four launchers within their sector.

<b>President Leader</b>	The Luna missiles will be useful to them. These missiles are very useful during the preparation stage of launching a counterattack. Then, the morale of the enemy will be weak and they will be mentally and physically exhausted when launching their counterattack.
<b>Minister of Defense</b>	They will not be able to have a counterattack because they are going to die inside the struck area.
<b>President Leader</b>	Strike them with the Luna missiles then.
<b>2<sup>nd</sup> Corps Commander</b>	Sir, if we launch the four Luna missiles, which have a 1 kilometer killing radius, every individual within the 1 kilometer radius will definitely be dead, just like throwing the fishing explosives in the water.
<b>President Leader</b>	Just as explosives in the water.
<b>2<sup>nd</sup> Corps Commander</b>	That is the impact of the missiles.
<b>Minister of Defense</b>	I think we should launch twelve Luna missiles along their defense positions.
<b>Planning Director</b>	Sir, we have eight launchers in the sector of the 2 <sup>nd</sup> Corps.
<b>2<sup>nd</sup> Corps Commander</b>	There are four launchers.
<b>Minister of Defense</b>	The enemy is now basing his hopes on the counterattack which their leader Abu-al-Hasan Bani-Sadr speaks about...these people...we will destroy them and then we will direct the missiles against the center of Dezful City, also using twelve missiles against the center of the city, Sir.

<b>President Leader</b>	Yes, in addition to that.
<b>Minister of Defense</b>	Twenty four missiles will be launched against them, which will destroy them directly and quickly.

<b>Minister of Defense</b>	The Luna missile has solid fuel, right?
<b>Planning Director</b>	Yes, Sir, it has solid fuel.
<b>Minister of Defense</b>	Does the R-17 missile require preparations?
<b>Planning Director</b>	One to two hours.
<b>Minister of Defense</b>	During the night?
<b>Planning Director</b>	The work occurs during the night, Sir.
<b>Minister of Defense</b>	Launching the missiles against the enemy's targets will begin with the first light and end with the last light. If we did not have information available at the central section more than this present force, we can consider it as (X) of a percentage in a worst case scenario and then evaluate the rating of the assignments. Do we need this number of units at the sector of the 2 <sup>nd</sup> Corps? If the answer is no, then which units can we release? And I think it should be considered a first priority task in order to reinforce the sector of Bsaiteen.

<b>Minister of Defense</b>	This will not affect you, because this is just an idea. However, after you return you can consult with the officers there and then call us and let us know.
<b>Planning Director</b>	Sir, there are two things. We can either discuss the remarks that are ready, concerning the issues put forth before dinner or have some time to brief the Commander in Chief of the Armed Forces and you about the remarks that were put forth. After that, the decision will be left up to you. Our remarks are ready
<b>2<sup>nd</sup> Corps Commander</b>	We can discuss the issue now.
<b>Minister of Defense</b>	We only need the summary. We do not want to get into the introduction, closing, or the details. What is the issue in a nutshell?
<b>Planning Director</b>	Sir, in terms of principle, we prefer or suggest assigning specific responsibilities to the divisions. There are two main directions. The first one is the road of the Strait of Bay Taq-Qasr-e-Shirin, and the second one is the Gilan road. The second road, Sir, is Islamabad - Gilan - Mafraq - Sayyed-Ahmed, which also leads to the position. This is in a section of the Qasr-e-Shirin sector. Therefore, these two roads enter a mountainous area and are better seized by the infantry. Generally the corps has done that. However, we prefer to have a headquarters the size of an infantry division that would be in charge of all directing, with the armored force behind it. What is the size of this armored force? The size is specified here in this study [ <i>continued on next page</i> ]

	up to the level of regiment (within). Therefore, the infantry will hold the main front points, which would be positioned with the armored elements in the rear, ready for counterattacking and destroying the enemy. It is important that the limit of responsibility is clear and for the units to operate among their original command. The other thing, the technique to seize these positions, is here and if your Excellency allows me, we can present it. We feel— <i>[Interrupted]</i>
<b>2<sup>nd</sup> Corps Commander</b>	We will discuss them one by one.
<b>Planning Director</b>	There are more troops assigned to the Sumar sector than it should have and there are more troops assigned to the Badra sector than we thought. There is an overlapping assignment of troops in general in both the Sarbil-e-Zahab and Gilan sectors. This is the general framework and if it is acceptable, the details are here.
<b>2<sup>nd</sup> Corps Commander</b>	I believe that none of the things you have mentioned contradict what I have said before.
<b>Planning Director</b>	No, Sir.
<b>2<sup>nd</sup> Corps Commander</b>	All of the 8 <sup>th</sup> Infantry Division is responsible for the road of Bay-Taq - Sarbil-e-Zahab. The 2 <sup>nd</sup> Infantry Division is responsible for the road of Gilan - Qasr-e-Shirin, which we positioned to hold the defense positions and the armor in the rear. The limits...the limits of responsibility will be placed...these are detailed technical issues, separating the borders and the headquarters. I have not contradicted any of the points that you have indicated.

I took one regiment from the 12 <sup>th</sup> Armored Division commander, Staff Brigadier General Mohammad Ismail, and he continued to ask me to return it to him. The mechanized brigade and the infantry brigade will not be enough to hold Sumar basin and it would require additional troops to control it.

<b>Minister of Defense</b>	Sir, this is the method they have reached in the current operation for bridging on the Karun river.
<b>President Leader</b>	No, as a study to have before our eyes to see whether it is beneficial to destroy the dam. How do we destroy it, so that it will not keep any collected water?
<b>Planning Director</b>	Sir, we made arrangements based on the transparent plan prepared at the General Military Intelligence Directorate. In the plan, the Directorate confirmed the size of the region that will possibly be flooded should the dam be destroyed. Let us discuss what are the procedures that we need to follow at the military ground operations level? I mean what will be the position of our troops there? Thus, Sir, I will call the authorized officer now. I requested him to be presence, and called the Minister of Irrigation this morning and he promised that he would send experts specialized in this regard. The results shall be submitted to see if we need to go there, check our position, and find out what is needed to be done there.

So, regarding the period of time where the stored water is the most in the dam, when is the right time for us to destroy the dam and for the water to gush out without flooding this region, in a way we do not let the stock [of water] to gather and flood this region due to a human act?

<b>President Leader</b>	Listen to the air raids that took place today to get an idea about the enemy's position for two days and where he reached.
<b>Minister of Defense</b>	Sir, I think they started getting tired and their aircraft have stopped, except for their raids against the vital targets, launching their bombs and then returning.
<b>President Leader</b>	They are sending their aircraft to nearby areas... they are watching an isolated village or any other target. Despite that, this farmer is emerging from between the trees to shoot them. Look... this party is the reason why I have approved of the People's Army since 1969. There was no contentment in this army until that year. I think the first formations of the army began in 1973.
<b>Planning Director</b>	The first formations of the army started in 1970.
<b>President Leader</b>	They began in 1971.
<b>Minister of Defense</b>	It is an organized force, Sir.

	Guards units. If the situation calls for them, they will answer.
<b>Minister of Defense</b>	We have prepared them, Sir.
<b>President Leader</b>	Therefore, our army can be completely free of worries and not have to look back. So, if these people spread out under each tree with a machine gun in their hands, it would not be like an army taking over a land with unarmed people. Now I am sure that if the enemy tries to conduct a parachutist landing or an airdrop landing by helicopters in any location in Iraq, they will be encircled by the residents of the area in all directions and in contact with them because they are armed, before they can reach their target, make arrangements, and advance.
<b>Minister of Defense</b>	It is a large organization of people (The People's Army).

<b>Military Logistics Director</b>	The ships continue to sail in the Shatt-al-Arab.
<b>Army Chief of Staff</b>	Why?
<b>Military Logistics Director</b>	Concerning the ships, Sir, he was saying an Iranian ship headed toward the Muhammara Port, which was attacked with the 106 mm artillery gun by our troops and engulfed in flames. This took place half past the 1300 hours.
<b>President Leader</b>	These people, don't they have ports? Why are they coming here? It could be that their other ports are not as vital as this one.
<b>Military Logistics Director</b>	It is an Iranian ship.
<b>Minister of Defense</b>	Some of their products are naturally from here with the railhead from Muhammara.
<b>President Leader</b>	Or because it is nearby, so that they can be supplied with a few barrels of oil from the gulf countries.
<b>Military Logistics Director</b>	They were attacked with 106 mm artillery guns by the 3 <sup>rd</sup> regiment of the 49 <sup>th</sup> Infantry Brigade that engaged in firing skirmishes against them. At half past 2300, a Chinese ship entered the Shatt-al-Arab toward Muhammara.

<b>President Leader</b>	To where do you mean?
<b>Military Logistics Director</b>	In the direction of Muhammara. The enemy began shooting at this Chinese ship and it was engulfed in flames, which veered off to the enemy's side and fourteen of its crew swam toward the Iraqi side.
<b>Minister of Defense</b>	They came to us?
<b>President Leader</b>	Okay, where was it headed, to Muhammara?
<b>Military Logistics Director</b>	Sir, it could be a transport ship that headed here. It seems that this ship has no communications. They are not directing the ships. They might inform them that this is a firing zone. Otherwise, they would not have come.
<b>Army Chief of Staff</b>	It must have lost its way and direction, and did not know where the location was.
<b>Military Logistics Director</b>	It could actually be a Chinese ship coming to Muhammara.
<b>Political Guidance Director</b>	Do they come only through the Shatt-al-Arab?
<b>President Leader</b>	Huh?
<b>Political Guidance Director</b>	Sir, I said do they come only through the Shatt-al-Arab?
<b>President Leader</b>	Only through the Shatt-al-Arab? Where are they from the world news?
<b>Military Logistics Director</b>	It is puzzling. He did not say why it was hit by the Iranians if it has an Iranian flag?

<b>Minister of Defense</b>	Sir, the bombers are not placed in shelters because they are too large. However, they built a trench-like ravine with an approach that has well-arranged edges and ground.
<b>President Leader</b>	Is it Walid Air Base?
<b>Minister of Defense</b>	It was in Walid Air Base. Part of it is located in Yemen and three of them are now located in Habbaniya Base.
<b>President Leader</b>	How many are now located inside the country?
<b>Minister of Defense</b>	Not all of them, Sir. However, I think there were only three located in Habbaniya.
<b>President Leader</b>	If they were placed in Walid Air Base, we must not discount the Syrians and Israelis. That is to say, it is true that the air base at Walid is far from the Iranians. However, what would prevent the Syrians? They could strike it. These are the aircraft that affected the Iranians in depth, even Israel.
<b>Minister of Defense</b>	There is nothing to stop them, unless they wait for—
<b>President Leader</b>	I think we should leave three of them in our hands and place them in separate positions. The rest of them should be located in Yemen. Whenever one of these three breaks down, we can pull another out to replace it and so on. This way there will be three of them operational with us at all times and the rest will be located outside Iraq.
<b>Army Chief of Staff</b>	One aircraft in Walid Air Base and the other in Tammuz Air Base.
<b>Minister of Defense</b>	We could even place them in Saudi Arabia because they [ <i>the Saudis</i> ] told us, "We have an international airport with such and such."

<b>Minister of Defense</b>	Yes, it is okay. I approve. However, it must be registered.
<b>Secretary of Diwan</b>	Yes, Sir. We need to compensate them for the Armored Personnel Carrier Command because they broke down many times with us. As the Armor Director told me, they repaired 40 tanks in the sector of the 5 <sup>th</sup> Mechanized Infantry Division, whereas it was returned to the division with full operation. They formed a platoon led by an officer with a rank of lieutenant colonel rank. He is Lieutenant Colonel Hussein Rawi.
<b>Deputy Chief of Staff of the Army for Operations</b>	They sent this to the 1 <sup>st</sup> Mechanized Infantry Division because it has failures.
<b>Secretary of Diwan</b>	Sir, they will move today to this sector.
<b>Minister of Defense</b>	Lieutenant Colonel Hussein Al-Rawi is good.
<b>Secretary of Diwan</b>	Yes, Sir. Lieutenant Colonel Hussein Al-Rawi, this needs an officer because these detachments are in the rear and need someone to direct them and follow-up on their issues. It appears that the remaining broken down vehicles that are on the road are listed in the losses status report. Yes.
<b>Minister of Defense</b>	We are afraid they will increase their losses.
<b>Secretary of Diwan</b>	No, it is not in their interest to do that. Each one of our tank battalions has 44 tanks. Therefore, their combat capabilities are good, compared to the enemy's forces, which have 25 tanks at the present.

<b>Deputy Chief of Staff of the Army for Operations</b>	Twenty-five tanks, that is, if all were operational.
<b>Secretary of Diwan</b>	Sir, how many are not operational? He mentioned that to me.
<b>Deputy Chief of Staff of the Army for Operations</b>	No, to the Iranian enemy.
<b>President Leader</b>	The enemy.
<b>Deputy Chief of Staff of the Army for Operations</b>	Because the information we have from the Intelligence indicates that the enemy has less than this number among his battalions.
<b>President Leader</b>	How many tanks does each Iranian battalion have?
<b>General Military Intelligence Director</b>	It has 53 tanks.
<b>President Leader</b>	So, why were you saying 25 tanks?
<b>Deputy Chief of Staff of the Army for Operations</b>	There are approximately 50 operational tanks in each battalion.
<b>Secretary of Diwan</b>	Yes, most of them are in the repair facilities being repaired. They also have a shortage in their ranks.
<b>President Leader</b>	The enemy's tank battalions?
<b>Secretary of Diwan</b>	Yes, Sir and this depends on the situation of reserved materials.
<b>General Military Intelligence Director</b>	They currently have 25 tanks in each battalion.
