ASSISTANT SECRETARY OF DEFENSE FOR LEGISLATIVE
AFFAIRS
ASSISTANT TO THE SECRETARY OF DEFENSE FOR PUBLIC
AFFAIRS
DIRECTOR OF NET ASSESSMENT
DIRECTORS OF THE DEFENSE AGENCIES
DIRECTORS OF THE DOD FIELD ACTIVITIES

SUBJECT: Force of the Future: Maintaining our Competitive Edge in Human Capital

The Force of Today is widely acknowledged as the best in the world, reflecting the ideals of a high-quality, all-volunteer force; the thorough integration of active and reserve components and supporting government civilians; the strength of seamless, multi-domain Joint operations; a focus on force care and wellness, with a priority on wounded warrior care; and sustained operational excellence as demonstrated in the wars in Iraq and Afghanistan these past 14 years. Accordingly, in this ever changing environment, one of my top priorities is to ensure the Force of the Future remains as great as the Force of Today, especially in terms of our most important competitive edge—*our people*. One important way to do this is to update and adapt the Department's active and reserve military and civilian personnel systems to account for new conditions affecting workforce markets, generational change, and innovative new practices in people and talent management, while retaining the professionalism, rigor, and tradition required for an institution charged with defending our Nation's interests. By making these changes now, we will ensure that the Department's future military and civilian members remain the very best in the world.

With this in mind, I directed Brad Carson, Acting Under Secretary of Defense for Personnel & Readiness, to examine the Department's civilian and military personnel practices and to identify creative and modern ways to upgrade our systems and processes. I tasked him to explore ways to increase the Department's *permeability* to new people and ideas, between its own internal components and with the private sector; improve our ability to attract new talent, recognizing that the *recruitment* of successive generations will likely require new approaches; improve *retention* incentives in a tightening labor market, and adapt current practices to attract current and future generations that may take a more transient approach to professional advancement; and modernize

our *talent management* systems and processes to reflect best practices and new technology opportunities.

To meet my intent, Brad has led an ambitious and trenchant effort over the past five months, which included meeting with Department, government, and private sector experts. Brad and his team exceeded my expectations, providing a package of bold proposals that could change Departmental personnel policies and procedures in unprecedented ways. Several of these proposals expand on what the Services are already doing to modernize their personnel practices, but others are new and complex, and require additional study to ensure they are implemented in a deliberate and durable manner.

I therefore directed the Deputy Secretary of Defense and the Vice Chairman of the Joint Chiefs of Staff to lead a Force of the Future Implementation Group to examine each individual proposal through several different lenses. For example, I asked them to assess a proposal's impact on warfighting readiness and the development of Joint operational excellence, and to identify its projected costs. I also charged them to ensure that the combination of any recommended proposals maintain a tightly knit Total Joint Force. Finally, I directed them to work as quickly as possible, with a goal of completing their review no later than December 15, 2015.

The first meeting of the Implementation Group was on October 9, 2015. The Group has met twice a week since then, working through the nearly 80 proposals and sub-proposals developed by A/USD(P&R), in close coordination with the three Military Departments and four Services. Based on their recommendations, I have approved the following initiatives designed to improve the Department's permeability to new people and ideas:

- An expansion of the corporate fellows program to increase the number of service members with experience in the commercial sector;
- Enhancements to current internship programs;
- The establishment of the Defense Digital Services to increase the Department's digital innovation by leveraging expertise in the private sector;
- The establishment of a task force to streamline the transition process and procedures between the Active and Reserve Components;
- Develop a process to better collect civilian skills extant in the Reserve Components;
- Request Congress to remove pilot restrictions associated with the Services' Career Intermission Program
- The designation of a Chief Recruiting Officer; and
- The establishment of an Entrepreneur-In-Residence Program

These efforts compliment many initiatives that I have already instituted and are well underway, such as pursuing a deeper partnership with the innovative technology sector through the stand-up of the Defense Innovation Unit-Experimental; establishing a new relationship with In-Q-Tel to tap into and leverage the vibrant venture capital community; revamping the Department's conference policy to ensure our people are receiving the newest and most innovative information in their fields; supporting Lean-In Circles across the Department to stimulate new ideas for women in service; and establishing an information exchange with the World Economic Forum.
